EDUCATION

Game Design & Technology Master's Programme

September 2024 - June 2026

Chalmers University of Technology and the University of Gothenburg | Sweden

- Master's Thesis: Advances in Volumetric Temporal Anti-Aliasing, with Frostbite (Electronic Arts)
- Expected graduation: June 2026

Bachelor of Science (Technology) - Computer Science, with honours

August 2021 - May 2024

Aalto University | Espoo, Finland

- Bachelor's Thesis: Inventory systems and item management in horror games

Upper Secondary Education

August 2018 - May 2020

Karis-Billnäs Gymnasium | Karis, Finland

EXPERIENCE

Master's Thesis Intern

January 2026 - Present

Frostbite, Electronic Arts | Stockholm, Sweden

- Implementing temporal anti-aliasing for volumetric rendering
- Working with compute shaders and real-time rendering systems
- Evaluating performance vs. visual quality in a production engine

Game Designer & Programmer

December 2024 - January 2026

Broken Cane | Helsinki, Finland

- Designed and implemented two boss fights for *Aris Arcanum*, a shipped Steam game
- Built core gameplay systems (dialogue, controller support)
- Iterated using playtesting and player feedback

Web Developer and Designer

March 2022 - October 2024

Digital Teaching Tools Finland Ltd - a Kahoot! company | Raseborg, Finland

- Developed core features for Kahoot! Sparks, a gamified learning platform
- Built interactive web tools for Whiteboard.fi (e.g. graphing calculator)
- Collaborated with designers and stakeholders on user-facing products

Creative Director / Product Owner

September 2022 - May 2023

Conscience and *Witch's Brew*, itch.io releases

- Created original concepts; led 7-person teams throughout development
- Directed game vision, narrative, and systems design, as well as voice acting sessions for *Conscience*
- Ran playtesting and iteration cycles, acting as Product Owner and Scrum Master

VBS Systems Administrator

July 2020 - March 2021

Military service | Nyland Brigade, Finland

- Created virtual battle simulations and led large-scale simulation sessions
- Maintained the simulation equipment and computer systems

SKILLS

Programming: C++, C#, GLSL, HLSL, Python, JavaScript, GDScript

Engines/Tools: Unity, Unreal, Godot, OpenGL, Vulkan, Git, Jira, Notion

Other: Playtesting, agile development, cross-disciplinary teamwork

Languages: Swedish (native), English (fluent), Finnish (good)

INTERESTS

Pinball design | Music performance | Theatre & musicals | Dance
